Accelerating Financial Services Results With No Magic Model Driven Enterprise Solutions

Financial

Issues facing Financial Services Today

- Complexity in applications development and maintenance costs
- Compliance issues (Sarbanes Oxley and others)
- Customer service levels
- Revenue optimization
- Mortgage volatility, credit in wholesale markets, nonperforming loans, declines in mortgage banking and loan origination fees
- Declining credit quality of loan portfolios
- Need to improve efficiencies, but not at the expense of customer satisfaction
- Technology that better serves customers with continued focus on customer service and convenience

To learn how to benefit from our financial expertise, call us. We have the experience and insights to help you succeed.

No Magic Financial Services Benefits:

- Improve workflow, reduce operating costs, advance customer service, and improve the satisfaction of customers and employees
- Customized enterprise solutions that fit your needs – a flexible, collaborative UML modeling solution designed around client requirements, supporting the IT strategic plan
- Our solution reduces the risk associated with in-house systems or non-OMG compliant tools
- Ability to leverage the value of your current technology investment - MagicDraw provides interoperability to all current technologies and legacy systems
- Better visibility of your business – Integrate disparate information sources and processes. Your team can aggregate information into a common and collaborative tool accessible from a web-browser
- Reduce operational costs – Benefit from improved speed to deploy, optimized resource allocation, improved collaboration and reduced overall cycle times
- Manage your IT budget more effectively – Flexible pricing options with reduced infrastructure investment
- No Magic has more than 12 years of proven industry experience employing best practices in delivering tailored solutions to our customers
- Cost Effective Solutions – Reduced capital investment, lower hardware/software maintenance, IT Resource and IT time savings, improved operational productivity
