

# SaveltSafe™

## Secure Backup Anywhere

**SaveltSafe™** delivers a packaged data backup service for ISPs, ASPs and businesses. The *SaveltSafe™* system provides secure and private online data storage services accessible anytime, anywhere, via any Internet connection.

**Easy to Use**, Backup and restore operations can be scheduled for automatic transfer. Interrupted transfers are automatically resumed at the next connection.

**Secure**, Customizable encryption options give individual users flexibility in securely transferring and storing their data on the backup servers.

**New Revenues**, Recurring revenue is based on subscriber activation and usage.

**Satisfied subscribers**, SaveltSafe provides a key differentiating service for providers.

**Reduced churn**, Stored critical and treasured data is kept safe and users are happy. Churn is dramatically reduced.

**Minimal upfront costs**, No initial charges for software licensing, no charges for installation, no charge for configuration!

**Quick startup**, Installation, configuration and training can be completed within just a few days. Commercial launch can begin right away. Launch SaveltSafe next week!

**Simple to operate!** Automated operation manages user accounts, reports and billing are easily integrated. Very little training is required.

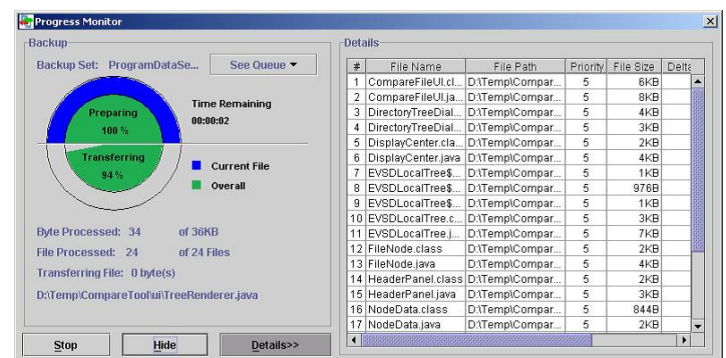

Internet Service Providers (ISPs), Application Service Providers (ASPs), Hosting & Storage Service Providers and businesses worldwide are reaping the benefits of delivering secure online backup services from *SaveltSafe™* to their users.

**SaveltSafe™ Corp.** has packaged the entire backup and restore service offering for quick deployment. You purchase the server and we do the rest. Our team will install and configure the system and then train your staff to the easy operation of *SaveltSafe™*. Sales training is also available.

Generate more revenue. Offer *SaveltSafe™*, services to your users, it the best **online secure backup service in the world!**

## SaveltSafe™ Ease and Reliability Flexibility and Security

Using *SaveltSafe™* is a snap. Choose the look and feel that's right for you. Windows? Java? Motif? All these environments are available, giving *SaveltSafe™* a seamless and intuitive user interface. Using *SaveltSafe™*'s browser window, you can backup individual files or entire directories. Choose the desired level of security: encrypt files once, even twice, before transfer. Select from various encryption algorithms or simply let *SaveltSafe™* know what level of security you desire. You can even designate the restoration options for each file.

Once encrypted, the *SaveltSafe™* system transfers your backup file to several locations via a secure socket layer. *SaveltSafe™* stores your current backup, along with backups one week, one month, and one year old, all in a read-only format, ensuring against file corruption from worms and viruses.

**SaveltSafe™ is HIPAA compliant.** Congressional regulations now require that certain data be securely transferred in compliance with the Health Insurance Portability and Accountability Act (HIPAA). *SaveltSafe™* is certified as HIPAA compliant.

## Compatibility and Speed

*SaveltSafe™* provides a single organization-wide data backup solution because it is platform independent. This means that users and departments across any organization can take advantage of *SaveltSafe™*,

regardless of platform and operating system. *SaveltSafe™*'s super-efficient **Delta Transfer Process** accelerates backup transfer speed by minimizing the size of the file exchanged. Only the changes are transferred. Because the *SaveltSafe™* **Delta Transfer Process** manipulates files byte-by-byte, all file types are processed without error. Your overhead for communication, backup tapes, and physical storage are greatly reduced. The bottom line? Significant **COST SAVINGS** you can take to the bank.

## SaveltSafe™: handy features for all levels of use

- Easy setup and user-friendly interface both backup and restore
- Ease of use through default configuration for first-time users, Wizard for intermediate users, and extensive configuration capabilities for advanced users
